**To:** Hiring Team / Talent Acquisition

**Subject:** Application for Developer Relations / Solutions Engineer

Dear Hiring Team,

I am writing to express my strong interest in the Developer Relations / Solutions Engineer position. After a decade of building distributed systems, reactive applications, and customer-facing automation, I am eager to bring my technical experience and communication skills to a role that focuses on helping developers succeed and driving adoption.

What excites me about this role is the opportunity to be the bridge between engineering and users. At N-SIDE, I regularly translated complex analytics and API behavior into clear, actionable guidance for consultants and customers. I productized backend services with TYK, improved OpenAPI documentation, and designed automation workflows that reduced manual deployment effort by more than half. I also led training sessions and wrote troubleshooting guides that made technical concepts accessible to non-technical stakeholders.

My strengths align strongly with what a DevRel / Solutions Engineer needs:

- **Technical depth:** over 10 years building backend systems with Scala, Java, TypeScript, AWS, Postgres, and CI/CD pipelines.
- **Customer empathy:** strong active listening and problem-solving skills, shaped by helping users with high-complexity workflows and technical onboarding.
- **Communication and storytelling:** experience producing technical documentation, demo-driven PoCs, videos, and structured internal guides.
- **Cross-functional collaboration:** experience as Kanban Lead and as the technical liaison between product teams, analysts, and client-facing consultants.

I want to join a team where I can use my engineering background to make complex solutions easier to understand and faster to adopt. I believe that a successful DevRel / Solutions Engineer does not just explain technology — they help customers connect it to their real business needs. My recent projects, including developer-focused content and interactive demos, reflect that mindset.

I would welcome the opportunity to discuss how my technical experience and advocacy mindset can contribute to your team. Thank you for considering my application.

Sincerely,

Pablo Antonio Rodriguez Rubio
