

Pablo Antonio Rodriguez Rubio

Software Engineer → DevRel / Solutions Engineer

☎ +32 476062894 | ✉ pabloantoniorodriguezrubio@gmail.com | 📧 pablorotten | 🌐 pablo-antonio-rodriguez-rubio
Software Engineer with over 10 years of experience now transitioning into DevRel and Solutions engineer.

Experience

- | | | |
|--|---------------------------------|-------------|
| Software Engineer | N-SIDE | 2021 - 2026 |
| <i>Advanced analytics SaaS platform optimizing complex clinical trials for pharmaceutical companies.</i> | | |
| <ul style="list-style-type: none">◦ API Design & Developer Experience: Productized a new REST API via TYK gateway by consolidating middleware logic into a single backend endpoint, boosting performance by over 50% and reducing client support tickets by 80% through proactive OpenAPI documentation updates.◦ Technical Storytelling & Client Support: Served as the technical bridge between end-users and core algorithm experts, translating complex simulation issues into clear visual diagrams and Confluence troubleshooting guides that accelerated bug resolution and solved the 70% of user-reported tickets.◦ Product Advocacy & Training: Led major UI overhauls including a high-expected and challenging smart bulk-edit patient groups workflow and high-performance tables, and conducted live training for 50+ consultants to migrate users to a seamless web flow that improved data entry speed up to 100x.◦ Solutions Engineering & Automation: Designed Argo workflows that automated over 50% of monthly client data extraction requests and accelerated QA/UAT instance deployments by 60-70%, completely eliminating error-prone manual operations.◦ Agile Facilitation: Served as Kanban Lead, leveraging active listening and strategic unblocking to streamline cross-functional communication and successfully optimize daily standups into an engaging, strict 15-minute format. | | |
| Software Engineer | Noesis Solutions | 2017 - 2021 |
| <i>Cloud-native collaborative platform transforming legacy desktop simulation workflows into web-based engineering solutions.</i> | | |
| <ul style="list-style-type: none">◦ Data Visualization: Engineered complex data visualization dashboards almost from scratch using Java Web Toolkit (JwT), enabling engineers to interactively analyze and render large-scale engineering datasets with hundreds of thousands of data points.◦ Knowledge Sharing: Created detailed internal documentation mapping out data sources, database extraction logic, and charting mechanics, successfully onboarding other developers and streamlining future dashboard iterations.◦ System Integration: Designed and implemented a full-stack feature to bridge the cloud platform with legacy desktop optimization software, automating the configuration of complex XML simulation templates directly via a web UI and eliminating the need for manual server-side interventions. | | |
| Freelance Software Developer | Remote / Granada, Spain | 2015 - 2017 |
| <ul style="list-style-type: none">◦ Mobile Development: Developed cross-platform mobile applications for iOS and Android from scratch using the Ionic framework.◦ Full-Stack Architecture: Designed and implemented backend services and REST APIs to support real-time mobile features, including GPS tracking for a bus application. | | |
| Software Engineer (Research & Development) | Universidad De Granada (DECSAI) | 2016 - 2016 |
| <ul style="list-style-type: none">◦ Joined the Department of Computer Science and Artificial Intelligence to develop a fuzzy model to enhance user profiles in microblogging sites using deep relations.◦ Utilized Java, JSP, and MySQL for data modeling and implementation. | | |

Education

Universidad de Granada

Granada, Spain

B.Eng. in Computer Engineering

2010 - 2015

- Focused on computer architecture and systems security.
- **Final Project:** Developed a complete real-time bus tracking system, including the Hybrid Android/iOS mobile applications and supporting backend infrastructure.

Personal Projects

P1 Beyond the Bytecode: Solving OWASP UnCrackable L1 with Guardsquare Tools *Technical Video & Documentation*

- Created a step-by-step guide on bypassing root detection and decrypting AES-256 secrets in Android apps using ProGuard Assembler.
- 📺 [YouTube video](#) | [Link to GitHub Repository](#)

P2 Movie Kombat: React + TypeScript Tournament App *Full-Stack Web Development & API Integration*

- Built an interactive movie bracket app using **React, TypeScript, and Tailwind CSS v4**.
- Integrated third-party API [TMDB](#) for movie search and platforms availability.
- [Link to GitHub Repository](#) | [Live App](#) | 📺 [Promo video](#) | [LinkedIn post](#)

P3 Fake Tinder: Progressive Web App (PWA) Experiment *Mobile Web Development & Social Engineering Concept*

- Developed a prank-oriented PWA that mimics native app installation on iOS/Android via web manifests.
- [Link to GitHub Repository](#)

P4 Technical Documentation & Learning Resources *Educational Content Creation & Knowledge Sharing*

- Comprehensive documentation of technologies and frameworks I used in my work and projects.
- **React:** React documentation with Vite and Tailwind CSS integration guides ([Vite + React + Tailwind](#) | [Learning React Guide](#))
- **Scala:** Documented advanced Scala concepts and Akka framework fundamentals for distributed systems ([Rock the JVM - Scala](#) | [Akka Essentials](#))
- **Java & ORM:** Technical notes on Hibernate framework covering entity mapping, transactions, and best practices ([Hibernate Course](#))

Skills

Technical Stack:  Scala  Akka  Java  JavaScript  TypeScript  React  AWS  GitLab  CI/CD  MySQL

Content & Creative:  CapCut  OBS Studio  Synfig  Photopea  Confluence

Languages:  Spanish (Native)  English (Full Professional)  French (Professional)  Dutch (Elementary)
